August 2025

**"We should not give up and we should not allow the problem to defeat
us."**

Dr. A.P.J. Abdul Kalam

Dear Parents,

August was a month filled with energy, curiosity, and joyful learning for our Grade 1 children at Dr. Abdul Kalam School. Each day brought new opportunities for exploration, practice, and discovery as the children steadily built their skills and confidence across subjects. In Telugu, English, Hindi, and Math, the students worked with dedication, blending reading, writing, and oral practice into their daily routine. They revisited familiar letters and sounds while also venturing into new words, spellings, and sentence patterns. Their enthusiasm during oral practice and reading sessions was heartwarming, as many children grew more fluent and expressive. In Mathematics, the class showed great excitement while mastering addition through number combinations, and their eagerness to solve sums reflected their growing problem-solving skills. Our EVS lessons added a practical dimension to learning as the children explored the human body, sense organs, food, and even the air around us, connecting concepts from the classroom to their everyday lives.

Beyond academics, August was filled with hands-on activities that made learning vibrant and engaging. The children loved the “Roll and Read” exercise in English, which turned practice with CVC words into a playful challenge. They also enjoyed building vocabulary visually, using pictures to connect objects with words in a meaningful way. The “Show and Tell” activity on fruits and vegetables gave them a chance to build confidence in communication while sharing their own thoughts with the class. Science lab sessions added excitement, whether it was creating a food chart, experimenting with sense organs, or crafting a paper fan to understand air movement. Each of these moments blended creativity with learning, making the classroom a lively place of discovery.

One of the highlights of the month was the Independence Day celebration. Our young learners proudly created the national flag using rice, masoor dal, moong, and brown rice for the flagpole. Their little hands worked with such care, and the result was a beautiful symbol of patriotism crafted with love. The celebration was filled with songs, stories, and a sense of pride that made the day truly special for both students and teachers.

August reminded us that learning is not just about lessons and tests but about nurturing joy, confidence, and curiosity in every child. It was wonderful to see our Grade 1 students grow in independence, participate wholeheartedly, and discover the fun in learning. We look forward to carrying this spirit into September with the same enthusiasm and dedication.
