August 2025

**"We should not give up and we should not allow the problem to defeat
us."**

Dr. A.P.J. Abdul Kalam

Dear Parents,

The month of August at Dr. Abdul Kalam School was filled with energy, curiosity, and joyful learning for our Grade 2 children. Each day brought new opportunities to explore, question, and discover, and it was heartwarming to watch the children grow in both confidence and enthusiasm.

In English, the students immersed themselves in stories that captured their imagination and strengthened their comprehension skills. They enjoyed reading, retelling, and answering questions with clarity, while building their vocabulary through fun exercises and worksheets. Their excitement during reading tests showed how much pride they took in their progress. In Mathematics, the focus was on building fluency with addition, and the children practiced sums with increasing speed and accuracy. The Math Lab sessions, where they worked with hands-on activities and clue words, made the subject come alive and helped them connect classroom lessons with real-life problem solving.

Environmental Studies was especially engaging this month, as our learners explored the world of wild and domestic animals. Through oral tests, spell bee practice, and lively discussions, they learned not only to identify animals but also to understand their habits, homes, and food patterns. The EVS lab provided a wonderful platform for children to use flashcards and explain concepts to their peers, building both subject knowledge and confidence in speaking. Science lab activities further deepened their understanding, as they classified animals and explained habitats with great enthusiasm.

Telugu and Hindi lessons continued to enrich the children's language skills, with reading, writing, and oral practice forming a strong foundation. From learning new letters and sounds to preparing for small oral and written tests, the steady practice supported their fluency and expression. The children showed growing ease in switching between languages, a skill that will serve them well in the years ahead.

August was also a month of celebration and togetherness. Independence Day was marked with patriotic pride, songs, and colorful activities that reminded the children of the values of freedom and unity. Life skills sessions encouraged them to think about making good choices, while "Show and Tell" activities gave them the platform to share their thoughts about animals in their own words. The AKS Spellbee competition added an element of excitement and healthy challenge, with students eager to showcase their vocabulary and spelling skills.

Above all, what stood out this month was the bright spirit of collaboration and joy in learning. Whether it was through worksheets, oral practice, lab sessions, or festive celebrations, our Grade 2 children embraced every task with curiosity and cheer. August was truly a month where learning and laughter went hand in hand, and we are delighted by the growth we witnessed in each child.

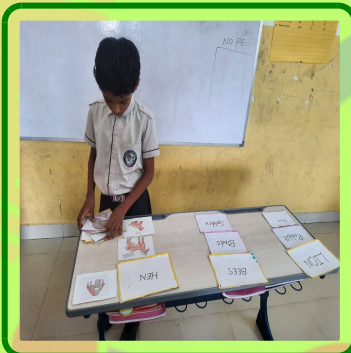

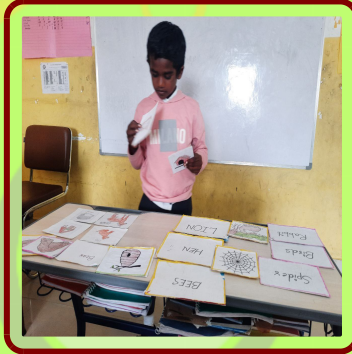

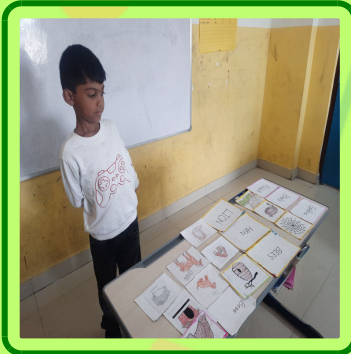

Warm regards,
Team@AKS
