**August 2025**

**"We should not give up and we should not allow the problem to defeat  
us."**

**Dr. A.P.J. Abdul Kalam**

Dear Parents,

The month of August was one of energy, exploration, and steady progress for our Grade 3 children at Dr. Abdul Kalam School. As the rains refreshed the world outside, the classrooms were alive with curiosity and determination. Our young learners worked with focus across subjects, demonstrating not only their growing knowledge but also their confidence in expressing it.

In language classes, children immersed themselves in stories and poems that sparked imagination and reflection. Reading tests in English, Hindi, and Telugu gave them the chance to showcase their fluency and comprehension, while spelling and vocabulary activities helped them build precision and accuracy. Many students showed delightful creativity as they practiced writing and speaking, enjoying the rhythm of words while gaining clarity in expression.

In Environmental Science, the children explored the eating habits of animals and then moved into the fascinating world of birds. They learned about different beaks, how each was suited for a unique purpose, and even created colorful charts and models to represent their ideas. These lessons came alive during enrichment and lab activities, where flashcards, drawings, and speaking practice allowed them to connect facts with real-life understanding. Social Studies lessons helped them think about the earth and its importance, while class discussions encouraged them to share thoughtful observations about nature and daily life.

Mathematics continued to be an exciting journey. Students practiced subtraction and multiplication with growing ease, and math lab activities added a playful dimension to learning. Using colored lines and patterns, they discovered new ways to visualize problems and enjoyed solving them with confidence. Step by step, they strengthened their skills and learned to approach challenges with patience and enthusiasm.

The month was also filled with joyful activities that balanced academics with creativity. ESL storytelling sessions encouraged children to spin tales using emojis and pictures, sparking laughter and imagination as they pieced together their own narratives. In science-related activities, they spoke about birds and food chains, building both knowledge and communication skills. The classrooms resonated with lively discussions, teamwork, and a sense of discovery.

Adding to the cheer, August brought moments of celebration. The spirit of Independence Day filled the campus with pride as students sang, danced, and expressed their love for the nation. Classrooms and corridors were decorated with tricolors, and the children participated enthusiastically in cultural programs that reminded us all of the values of unity and freedom. These experiences gave them a deeper sense of belonging to both their school and their country.

Overall, August was a month of balance—where structured learning met joyful exploration, and where every child found opportunities to shine in academics, activities, and celebrations. Their enthusiasm and dedication made the month truly special, and we look forward to carrying this momentum into September.

Warm regards,

Team@AKS

### *Student enrichment activity on birds beak*

Students at Dr. Abdul Kalam School engaged in a lively enrichment activity on birds' beaks, where they explored how shape relates to function. The session encouraged curiosity and helped them connect classroom learning with the natural world.

## AKS Bytes August 2025

### Science lab activity Speaking skills about different type of beaks

Students at Dr. Abdul Kalam School explored different types of bird beaks in the science lab and shared their ideas confidently. The activity encouraged clear speaking while linking science learning with everyday observation.
