August 2025

**"We should not give up and we should not allow the problem to defeat
us."**

Dr. A.P.J. Abdul Kalam

Dear Parents,

The month of August at Dr. Abdul Kalam School was filled with energy, learning, and joyful experiences for our Grade 5 students. As the rains refreshed the days outside, our classrooms came alive with curiosity and dedication. Children engaged deeply with their subjects, moving steadily through lessons, activities, and assessments that built both knowledge and confidence.

In language learning, students immersed themselves in stories, poetry, and thoughtful lessons across English, Telugu, and Hindi. They practiced reading with expression, prepared for spell bee challenges, and strengthened comprehension through question-and-answer sessions. The joy of discovering new vocabulary and stretching sentences into more descriptive writing encouraged creativity and brought out each child's unique voice.

Mathematics this month was especially lively, as students explored factors and multiples through a hands-on lab activity using grids. They also worked with fractions in a case study approach, which helped them see how numbers connect to real life. The balance of problem-solving in classwork and the excitement of practical activities made the subject both challenging and enjoyable.

In Environmental Science, children studied the skeletal, muscular, and nervous systems, even sketching and labeling diagrams to reinforce their understanding. They also learned about good health and non-communicable diseases, discussions that tied in meaningfully with our emphasis on well-being. Social Studies lessons carried them across the globe, from weather and climate to the fascinating landscapes and cultures of the Democratic Republic of Congo and Greenland. These explorations broadened their awareness of the world and inspired thoughtful questions.

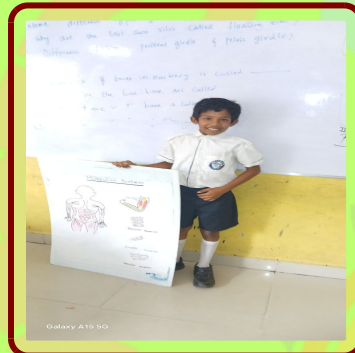

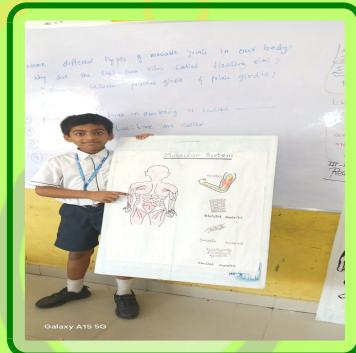

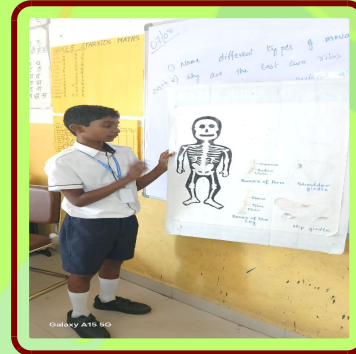

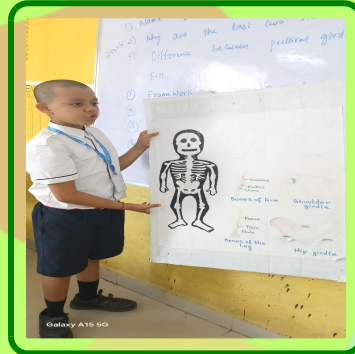

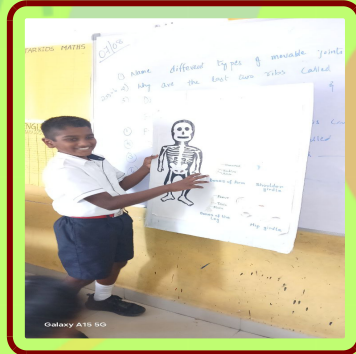

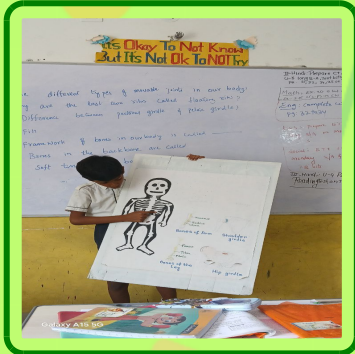

Beyond academics, August offered a variety of activities that brightened the school days. Fun drawing sessions, especially creating cute animals, gave children a creative outlet. Our English activity on sentence stretching boosted descriptive writing and promoted imaginative thinking. The month also witnessed the much-anticipated Spell Bee competition, where students displayed not only their preparation but also their poise and enthusiasm.

AKS Bytes August 2025

Explaining about skeletal and muscular system.

Students at Dr. Abdul Kalam School explored the skeletal and muscular system through engaging explanations. They asked thoughtful questions and showed great curiosity as they connected classroom learning with the workings of their own bodies.
