August 2025

"We should not give up and we should not allow the problem to defeat us."

Dr. A.P.J. Abdul Kalam

Dear Parents,

The month of August was filled with joy, curiosity, and meaningful learning for our little ones in Nursery. Each day brought fresh opportunities to explore letters, numbers, creativity, and the world around them. The children showed remarkable enthusiasm as they developed early literacy skills, tracing their very first letters and beginning to recognize the shapes and sounds that form the foundation of reading. Alongside this, they eagerly practiced early numeracy, tracing numbers, identifying quantities, and enjoying playful exercises that helped them see numbers as friendly and useful companions in daily life.

August also gave us the chance to strengthen fine motor skills through hands-on activities. The children used small objects to sort and group, developing the precision and control needed for writing. Their creativity shone when they built the letter "A" using colorful pop sticks, turning learning into a tactile and joyful experience. The theme of "Parts of the Body" captured their imagination as they carefully identified and placed eyes, ears, noses, and mouths on drawings. They delighted in sketching their own versions too, proudly sharing their work with teachers and friends.

A highlight of the month was the celebration of Independence Day. The children dressed in bright colors and participated in age-appropriate activities that helped them feel the spirit of togetherness and pride. Their innocent voices and cheerful expressions brought warmth to the day, reminding us of the importance of nurturing both knowledge and values. Play and exploration also remained at the heart of school life. Through block play and number chain activities, the children learned to cooperate, take turns, and celebrate small accomplishments. Laughter and excitement filled the classrooms as friendships continued to blossom.

August was indeed a month of growth, discovery, and happy memories. We look forward to many more such moments as our children continue their journey of learning and wonder.

Warm regards,

Team@AKS

AKS Bytes August 2025

Fine motor skills Small object into groups

Children at Dr. Abdul Kalam School practiced sorting small objects into groups, which strengthened their fine motor skills. They worked with focus and shared their discoveries with enthusiasm.
